

Prove your carbon credentials. Win more business.

Measure it. Report it. Prove it.

WIN TENDERS

A Carbon Reduction Plan backed by measured data is now a prerequisite for public sector contracts over £5m. Tier 1 contractors increasingly demand the same from their supply chains. With Aquarius Reporting for Carbon, you can respond with confidence to any tender requirement.

CUT COSTS

Identify the biggest emissions hotspots across your materials, waste streams, and utilities. Understanding where emissions come from is the first step to cutting the costs behind them, making your business leaner and more competitive.

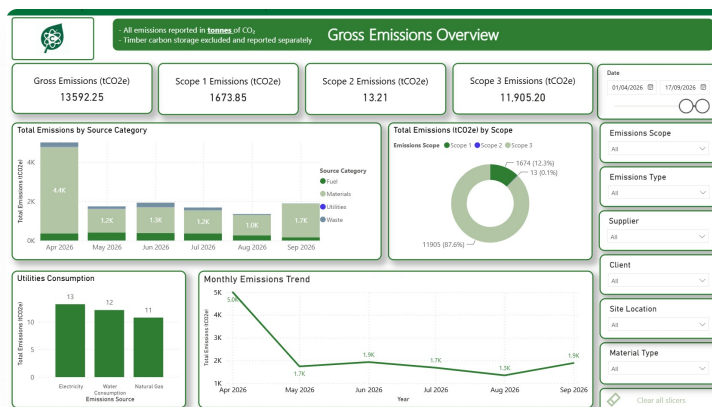

MEET REGULATIONS

PPN 006 requires measured Scope 1, 2 and relevant Scope 3 emissions, signed off by a director, and published on your website. Our report gives you exactly what is needed, with the data accuracy that estimates simply cannot provide.

POSITIVE IMPACT

Track your progress toward net zero with reliable baseline data and year-on-year comparisons. Build a credible Carbon Reduction Plan, demonstrate real environmental improvement, and show clients and stakeholders that your commitments are measurable.

Gross Emissions Overview: Scope 1, 2 and 3 in a single interactive dashboard.

WHAT IS AQUARIUS REPORTING FOR CARBON?

Produced by Graeme Hills Consultancy in partnership with 507 Climate, Aquarius Reporting for Carbon is a Power BI reporting platform that turns your raw activity data into clear, accurate carbon emissions reports. It covers Scope 1, 2 and 3 across fuel, materials, waste and utilities, and gives you report-ready data for any client, regulator or tender requirement.

Under PPN 006, estimates are not sufficient. Any supplier bidding for UK public sector contracts over £5m must now have a Carbon Reduction Plan backed by *measured* emissions data, signed off at director level. Most small or medium-size contractors currently have no way to produce one. Aquarius Reporting for Carbon changes that in two weeks.

£5m

**CONTRACT THRESHOLD
TRIGGERING PPN 006**

WHAT DOES IT DO?

Aquarius Reporting for Carbon helps you capture, measure and present your carbon emissions accurately across all three scopes. It integrates data from your operations to give you a single, reliable picture of your environmental impact, updated as your data grows throughout the year.

WHO IS IT FOR?

Aquarius Reporting for Carbon is designed for Tier 2 construction contractors who need to respond to emissions requirements from clients, Tier 1 contractors, or public sector procurement. It is equally suited to any business looking to measure, manage, and demonstrate its carbon performance. Most businesses are up and running within two weeks.

WHAT DO YOU GET?

A full suite of carbon reports covering Scope 1, 2 and 3 emissions across fuel, materials, waste and utilities. Each report is interactive, filterable by client, site, supplier and date, and ready to export or share at any time.

- ✓ Measured baseline emissions across Scope 1, 2 and relevant Scope 3 (PPN 006 compliant)
- ✓ Monthly trends, source category breakdown, and site-by-site analysis
- ✓ Materials Sourcing page identifying your biggest emissions hotspots
- ✓ Timber Negative Emissions tracked separately for FSC-certified materials
- ✓ Full support and annual data updates included

Built around your business

Aquarius Reporting for Carbon is configured to reflect your operations, your suppliers, and the clients you report to. KPIs, distribution lists, and report pages are all tailored to fit your firm. Most businesses are up and running within two weeks.

PPN 006 COMPLIANCE

WHAT A CARBON REDUCTION PLAN MUST CONTAIN

- ✓ **Measured baseline emissions** covering Scope 1, 2 and relevant Scope 3
- ✓ **Commitment to net zero by 2050** signed off by a director
- ✓ **Interim reduction targets** with specific dates and milestones
- ✓ **The actions you are taking** to reduce emissions across your operations
- ✓ **Published on your website** and accessible via URL at contract award

Aquarius Reporting for Carbon provides the measured, accurate emissions data that forms the foundation of a compliant plan.
